

Project Design Phase Solution Architecture

Date	26 June 2026
Team ID	
Project Name	Automated Network Request Management System
Maximum Marks	4 Marks

Solution Architecture:

Solution Architecture is a structured approach that defines how business requirements are transformed into a scalable, secure, and efficient technical solution. In the **Automated Network Request Management System Using ServiceNow**, the solution architecture integrates the Service Portal, Service Catalog, Flow Designer, custom tables, approval workflows, notifications, and reporting components into a unified platform. This architecture ensures that network service requests are processed automatically from submission to completion while maintaining transparency, security, and operational efficiency.

Architecture Components

The architecture of the Automated Network Request Management System Using ServiceNow consists of the following components:
